

PRODUCT No. 8215

Submersible garden automatic pump LKS-1102SE

(Illustrative photograph)

Technical data

Pump:

Material (body of the pump)	Stainless
Weight	11 kg
Max. flow	5,5 m ³ /hour
Max. liquid temperature	35 °C
Max. submersion depth	12 m
Switching on pressure	2,5 bar
Connection	DN 25
Cable length	15 m
Dimensions (diameter x height)	163 x 493 mm

Motor:

Output	1100 W
Insulation class	F
Protection level	IPX8

Attributes

- Submersible garden automatic pump for pumping clean water without abrasive particles.
- Built-in intelligent control device.
- Automatic operation, copper motor winding, built-in motor thermal protection.
- Used for pumping water from wells and tanks.
- For smaller irrigation systems, pumping, retention tanks.
- Equipped with a 15 m long power cable.

Product purpose

- Designed as a submersible pump for pumping clean or slightly contaminated water.
