

PRODUCT No. 8216

Submersible garden automatic pump with side intake LKS-1102SE-1

(Illustrative photograph)

Technical data

Pump:

| | |
|--------------------------------|--------------------------|
| Material (body of the pump) | Stainless |
| Weight | 12 kg |
| Max. flow | 5,5 m ³ /hour |
| Max. liquid temperature | 35 °C |
| Max. submersion depth | 12 m |
| Switching on pressure | 2,5 bar |
| Connection | DN 25 |
| Cable length | 15 m |
| Dimensions (diameter x height) | 187 x 486 mm |

Motor:

| | |
|------------------|--------|
| Output | 1100 W |
| Insulation class | F |
| Protection level | IPX8 |

Attributes

- Submersible garden automatic pump with side intake for pumping clean water without abrasive particles.
- Equipped with float set of 1 m length with PE outer tread of 1" ended with float ball.
- Built-in intelligent control device.
- Automatic operation, copper motor winding, built-in motor thermal protection.
- Used for pumping water from wells and tanks.
- For smaller irrigation systems, pumping, retention tanks.
- Equipped with a 15 m long power cable.

Product purpose

- Designed as a submersible pump for pumping clean or slightly contaminated water.
