Attributes

- Made of hot-dip galvanized steel sheet.
- Surface finishing made by powder paint.
- Version with 3 divided openings for collection of separated waste.
- Bins are primarily intended for indoor use.
- The bin consists of a waste container, hinged lid and collars (standardly supplied without embossing on the collar).
- There are divided chambers inside the container for each kind of waste.
- Plastic bag is inserted into each chamber which is then fixed by clamping frame.
- The container is obtained with plastic feet and handles.
- The colour of the bin collar is supplied in the standard colour offer.

Colour variations

- Body / collar – Grey / blue, green, black, yellow, brown, red.

Product purpose

- Designed for collection of common separated waste in the interior areas.

Additions

- At the customer's request, the bin can be supplied with a colour shade according to the specification.
- Standardly supplied without collar embossing.
