

PRODUCT No. B0446

Metal barrel – 200 l – 1 plug

(Illustration photograph)

Technical data

Material	Galvanized steel sheet
Material thickness (bottom/casing)	1,2 / 1,2 mm
Weight	20,5 kg (+/- 3 %)
Capacity	200 l (+/- 3 %)
Plug (bottom)	1x G2"
Finishing	Galvanized
Diameter	595 mm (+/- 3 mm)
Height	820 mm (+/- 3 mm)
UN code	YES

Attributes

- The barrel is suitable for transport and storage of liquid substances.
- Stamping on the lid means approval for transport according to international regulations (IMDG-Code, RID, ADR).
- The barrel is made of steel galvanized sheets.
- Housing is welded and strengthened with pressed stiffeners.
- Storing only in vertical position.
- The bottom and lid is connected with housing by multiple safety folding.
- A sealing substance is applied in the folding to provide tightness that is examined with each barrel.
- The filling opening is closed by a plug that can be secured by a protective cap with a tear-off strip. This ensures original condition of the packaging.
- Can be used multiple times, reconditioned and recycled.

Product purpose

- Designed for storing and transportation of all kinds of liquid substances.

Additions

- Can be ordered with products no. 3247 and 0735 – Barrel openers.
