

PRODUCT No. B0464

Metal barrel – 200 l – 2 plugs

(Illustration photograph)

Technical data

| | |
|------------------------------------|------------------------|
| Material | Galvanized steel sheet |
| Material thickness (bottom/casing) | 1 / 1 mm |
| Weight | 17,2 kg (+/- 3 %) |
| Capacity | 200 l (+/- 3 %) |
| Plug (housing) | 1x G2" |
| Venting plug (bottom) | 1x G3/4" |
| Finishing | Galvanized |
| Diameter | 595 mm (+/- 3 mm) |
| Height | 820 mm (+/- 3 mm) |
| UN code | YES |

Attributes

- The barrel is suitable for transport and storage of liquid substances.
- Stamping on the lid means approval for transport according to international regulations (IMDG-Code, RID, ADR).
- The barrel is made of steel galvanized sheets.
- Housing is welded and strengthened with pressed stiffeners.
- Storing only in vertical position.
- The bottom and lid is connected with housing by multiple safety folding.
- A sealing substance is applied in the folding to provide tightness that is examined with each barrel.
- The filling opening is closed by a plug that can be secured by a protective cap with a tear-off strip. This ensures original condition of the packaging.
- Can be used multiple times, reconditioned and recycled.

Product purpose

- Designed for storing and transportation of all kinds of liquid substances.

Additions

- Can be ordered with products no. 3247 and 0735 – Barrel openers.
