

PRODUCT No. 8309-B

Replacement battery CAS – 18 V / 4 Ah

(Illustrative photograph)

Technical data

Battery type	Lithium-ion
Capacity	4 Ah
Voltage	18 V
For type	8231 / 8309

Attributes

- Replacement batteries of the CAS system for filling stations supporting the CAS system.
- Patented charging technology.
- Constant electronic control of individual cells during charging – long service life.
- Controlled charging and discharging system.
- Minimum self-discharge.
- The battery is suitable for pump stations of type 8231 and 8309.

Color variations

- Standardly in black color.

Product purpose

- Designed as a replacement battery for filling stations with the CAS system.
