

PRODUCT No. 8227

Chemical rotary pump

(Illustration photograph)

Technical data

Material (body/sealing)	PP/PTFE
Capacity	30 l/min
Weight	5 kg
Connection	G2"
Length of suction tube	980 mm
For barrels	60/200/220 l

Attributes

- Made of material Teflon for sealing, then polypropylene material for pump.
- Pump is used in an industry.
- Rotary drum pump with 4 vanes with higher suction possibility.
- Used for pumping diesel, oils up to SAE 140 viscosity and AdBlue.

Product purpose

- Designed for pumping diesel, oils up to SAE 140 viscosity and AdBlue.

Additions

- Before using for pumping other aggressive liquids/acids, it must be discussed with the manufacturer.
