

PRODUCT No. 4996

Manually operated pump – stainless

(Illustration photograph)

Technical data

Material (sealing/pump)	EPDM/Stainless
Output	30 l/min
Connection	G2" a 6/4"
For barrels	60/200/220 l

Attributes

- Made of EPDM – ethyl-propylene M-class rubber and stainless material for pump.
- Suitable for pumping of food liquids, alcohols, oils – liquids of max. viscosity 140 SAE.
- Pump is not suitable for pumping of acetone.

Product purpose

- Designed for pumping of food industry liquids. For substances up to viscosity of 140 SAE.

Additions

- Before using it for pumping other aggressive liquids / acids, this option must be discussed with the manufacturer.
