

Mobile lubricating pump
TYPE: F3B_4976_0000

Illustrational photograph

TECHNICAL DATA

Pump body material	steel
Pump head material	zinc cast iron casting
Surface finishing	all steel parts are galvanized
Weight (incl. packaging)	4,9 kg
Pumped media	lubricating greases up to NLGI 2
Pumped volume/stroke	3,8 cm ³
Supply hose	armoured hose, 11 x 1200 mm
Lubricant delivery	by hand lever
Lubrication drag piston	for 15 kg container
Lubrication drag piston diameter	240-270 mm
Suction pipe length	370 mm
Pumping pressure	up to 200 bar

ATTRIBUTES

- Allows use of original lubrication cartridges, regardless of the power source.
- The kit contains a lubrication press, a dust cover, a pressure membrane, a pressure hose (1,2 m), a dispensing attachment with a chuck coupling.
- Suitable for original cartridges (15 kg), with inner diameter of the container 240 – 270 mm.

PRODUCT PURPOSE

Product is designed for mobile lubricant delivery.
