

Anti-fatigue mat for static-sensitive workplaces Senso Dial - black TYPE: 8443

Illustrational photograph

TECHNICAL DATA

Material	SBR/NBR top surface, EPDM foam base
Surface finish	Deckplate pattern
Colour	Black
Weight	3 kg
Operating temperature (min./max.)	-10 °C / +70 °C
Dimensions (W x L x H)	600 x 1000 x 10 mm

ATTRIBUTES

- Made of SBR/NBR material for top surface and an EPDM material as a foam base.
- ESD anti-fatigue mat with excellent all-round safety features.
- Suitable for general industrial use.
- Foam backing provides fatigue-relief.
- Rubber top surface is effective in reducing slip risk.
- Hardwearing and resistant to oil spillage.
- Mat is suitable for dry indoor environments only.
- Installation method: loose lay.
- Measured according to IEC 61340-4-5.
- Ramped edges.
- Good benzine resistance (also suitable for unleaded fuel): 70 h, 23 °C, Fuel B (ISO 1817), 20 % volume swell for minor mechanical demands.

PRODUCT PURPOSE

Product is designed as an anti-fatigue mat for static-sensitive workplaces.

ADDITIONS

Possibility to purchase ESD kits and accessories.

CLEANING METHOD

Brush/mop the top surface.
