

Bin Titan for waste separation – brown throw-in
TYPE: F2O_8465_5000

Illustrational photograph

TECHNICAL DATA

Material	Steel
Capacity	120 l
Weight	28,2 kg
Liner dimensions (L x W x H)	350 x 404 x 960 mm
Bin dimensions (L x W x H)	390 x 500 x 1335 mm

ATTRIBUTES

- The waste bin is made of galvanized steel with a powder-coated finish.
- Surface finishing provides durability and resistance to weather conditions.
- Parts of the bin are colour coded for identification of waste type.
- The bin is supplied with a set of connectors, allowing the bins to be arranged in a row.
- The bin's construction is based on two anti-slip adjustable legs and two wheels.
- There are side handles on the bin's body.
- Doors are equipped with lock, and the bin's threshold features a stainless-steel slide protecting it from damage.
- Equipped with a label to identify the waste type.
- The bin is standardly supplied with a varnished steel liner with 120 l capacity and possibility of attaching with chain.
- Thanks to the surface finish the bin can be placed outside and can be anchored to the ground.

COLOUR VARIATION

Body / parts / liner – grey (RAL 7016) / brown (RAL 8017) / grey (RAL 9006).

PRODUCT PURPOSE

Product is designed as bin for collecting separated waste.
